

What You Need to Know About FRACTORA

Fractora delivers targeted bipolar RF energy to various selectable depths in the skin. Fractora meets and exceeds the results of fractional CO2 without the associated downtime, prolonged redness, and pigmentation drawbacks. Fractora achieves full-scale treatment depths with customizable fractional energy to improve superficial skin tone problems (photo damage) to deep textural concerns (lines and tightening). Clinicians can select between variable depths, densities and energy levels for results that were previously unattainable without excisional surgery.

- You will need to arrive at the office 45-60 minutes BEFORE your procedure with your provider to have a topical lidocaine mixture applied to help numb the skin to reduce pain.
- If you are having a full face and/or neck treatment, we recommend taking a mild sedative (Xanax) and Tramadol (pain reliever) when you arrive in the office. Your provider will call this to your pharmacy PRIOR to your procedure (please provide pharmacy phone number and date of birth) and you will bring it with you the day of your procedure. This allows you to relax and allows your provider to use the appropriate energy level to achieve the best results.
- If you are taking a sedative as above, you will need to have a driver take you home. We can also help you arrange car service round trip if needed. Plan to be in the office for 90 minutes total.
- You will have some redness and mild swelling for up to 72 hours. Do not wear make-up or use any products other than the Aquaphor given to you by your provider after the treatment.
- You may experience some flaking and dryness up to 1-2 weeks after, depending on the depth of the treatment and your skin type.
- Your second treatment will be scheduled 4-6 weeks after your first treatment.
- Avoid sun exposure before and after the treatments and be sure to use SPF 50 up to 2 weeks after your treatments.
- Avoid retinol products 1-2 week before and after your treatments.
- The results will continue to improve up to 6 months after your treatments and last up to 5 years.
- We do not allow refunds on laser and all packages must be pre-paid (series of 2 for Fractora). NO SHOWS OR LATE CANCELLATIONS (WITHIN 24 HOURS OF SCHEDULED APPOINTMENT) WILL FORFEIT TREATMENT FOR THAT DAY AND WILL BE CHARGED AS A TREATMENT. Thank you for your understanding as we block our schedules 90 minutes for this service.
